Advances In Culture And Psychology

Filipino psychology, or Sikolohiyang Pilipino, in Filipino, is defined as the psychology rooted on the experience, ideas, and cultural orientation of the Filipinos. It was formalized in 1975 by the Pambansang Samahan sa Sikolohiyang Pilipino (National Association for Filipino Psychology) under the leadership of Virgilio Enriquez, who is regarded by many as the father of Filipino Psychology.

In many cultures, people reason about number, time, and other conceptual domains using space. For example, Americans and Europeans implicitly associate smaller numbers with the left side of space and larger numbers with the right side, forming an implicit “mental number line” (1, 2).Although the mental number line has been the subject of hundreds of studies (), its phylogenetic origins ...

Culture (/ ' k ʌ l tʃ ə r /) is an umbrella term which encompasses the social behavior and norms found in human societies, as well as the knowledge, beliefs, arts, laws, customs, capabilities, and habits of the individuals in these groups.. Humans acquire culture through the learning processes of enculturation and socialization, which is shown by the diversity of cultures across societies.

Culture - Wikipedia

The authors write, "Turkish culture is more interdependent than Dutch culture, which could imply that any type of insult in Turkey is an insult to one's interdependent self, encompassing both the self and relations whereas in the Netherlands, it is an insult to the self only" (pg. 341; van Osch et al., 2013). 10.4.2. Learning Theory

We propose that an alternative model for the so-called collectivistic culture and interdependent self is the concentric system framework, which posits a multilayered self that inhabits a ritual space, a space marked by fundamental distinctions of inner and outer, sacred and profane, and so on (see Figure 4.1). In sharp contrast to the objective, homogenous space-time of the secular worldview ...

Brief Summary. Basic premise: Thoughts, feelings and behaviors are inter-related, so altering one can help to alleviate problems in another. Essence of therapy: Cognitive therapy aims to help the person identify, challenge, and modify dysfunctional ideas related to panic symptoms (e.g., catastrophic consequences of bodily sensations). Avoidance of panic and panic-cues is targeted through ...
