Herbal medicine (also herbalism) is the study of pharmacognosy and the use of medicinal plants, which are a basis of traditional medicine. There is limited scientific evidence for the safety and efficacy of plants used in 21st century herbalism, which generally does not provide standards for purity or dosage. The scope of herbal medicine commonly includes fungal and bee products, as well as ...

Bitters (plural also bitters) is traditionally an alcoholic preparation flavored with botanical matter so that the end result is characterized by a bitter, or bittersweet flavor. Originally, numerous longstanding brands of bitters were developed as patent medicines, but now are sold as digestifs, sometimes with herbal properties, and as cocktail flavorings.

Anthraquinones, as the name implies, are phytochemicals based on anthracene (three benzene rings joined together). At each apex of the central ring is a carbonyl group (carbon double-bonded to oxygen), and these provide the quinone part. Not all anthraquinones are strictly quinones; for example, the sennosides are dianthrone consisting of two anthrone units, each bearing only one carbonyl group.

Anthraquinones - an overview | ScienceDirect Topics

Třezalka tečkovaná (*Hypericum perforatum*) je známým představitelem rodu třezalka. Je to vytrvalá bylina se vstřícnými jednoduchými listy a zlatožlutými, pravidelnými květy v bohatých květenstvích. Je rozšířena v Evropě, Asii a severní Africe. V České republice roste zejména na výslunných stanovištích nižších a středních poloh.
