(October 6, 2020 / JNS) When the prominent Switzerland-based chemistry journal *Molecules* recently announced that its special January 2021 issue would feature a paper from a researcher at Ariel University in Samaria, a group of scientists immediately protested.. Their response had nothing to do with the content of Mindy Levine's study, however. No, the academics—led by 2018 Nobel Chemistry ...

The 'chemistry' of anti-Israel propaganda

Plastic is durable and long-lasting, making it useful for packaging things like food, but not so good for the environment. Plastic in landfills can take hundreds of years to degrade, and plastic debris in the ocean is a threat to marine life.. Traditional plastic is made from petroleum, but there is a movement now to make plastics from more renewable—and in some cases biodegradable—organic ...
