The Nissan Primera is a large family car which was produced by the Japanese automaker Nissan from 1990 to 2007, for the markets in Japan and Europe. In Japan, it replaced the Auster/Stanza, and was exclusive to Nissan Prince Store locations. In North America, it was the entry level luxury sports sedan for the Infiniti brand. The word "primera" in Spanish means "first", in its female form.

The boost controller sits between your turbocharger and wastegate, where it modifies the pressure signal for more consistent performance.. When the air pressure leaving the turbo exceeds the preload of the spring inside the wastegate, the wastegate opens a valve allowing some exhaust gases to bypass the turbo, reducing boost to safe levels.

Boost Controllers - Manual & Electronic Boost Controllers ...

Ford used a variety of 5 speed manual transmissions in their compact and full-size truck lines, beginning in the 1980's. Virtually all of these transmissions were outsourced and changed frequently, particularly in the compact lines. But two of their most prevalent models were introduced in 1988; produced by Mazda for Ford applications - predominantly Ranger / Explorer & F-150 / Bronco.

The BD Familia, first shown on 2 June 1980, was entirely new - it was Mazda's first front-engine, front-wheel drive subcompact car, and was available as a hatchback and sedan. It was developed with input from Ford , which in 1979 had acquired a stake in the Japanese manufacturer, and had a twin called the Ford Laser (and Ford Meteor, for its ...

Mazda Familia - Wikipedia

While speed is constant the engine turns an input shaft attached to the transmission and the output shaft of the transmission is adjusted to turn the wheels at the required speed. Manual transmissions are the simplest type and these are simply a system of interlocking gearwheels.

The ECT sensor is a thermistor that varies the voltage output with engine temperature. When the engine is cold, the sensor's resistance is high, and as engine temperature rises, the resistance falls. The computer uses the ECT voltage signal to delay shifts and prevent TCC engagement until the engine warms up.

The engine is mated to a six-speed manual gearbox. The other new engine is a 1.6 litre CRDi diesel. This is a complete upgrade of an old engine. A new high-pressure injection system and a continuously-controlled variable oil pump has been added to reduce friction loss within the engine. This engine is available with a new seven-speed dual ...
