Dehydration can sometimes cause blood pressure to drop. However, dehydration does not always cause low blood pressure. Fever, vomiting, severe diarrhea, overuse of diuretics and strenuous exercise can all lead to dehydration, a potentially serious condition in which your body loses more water than you take in.

If we compare the characters of Saturday Night Fever to the movies of today, it could be hard to look past the disco camp to relate to the stagnant lives of the young Brooklynites stuck in menial jobs. The role that made a star of John Travolta was also a commentary on youth culture amid the phase of the dance craze featured in the story.
