Tearoom Trade: Impersonal Sex in Public Places is a 1970 book by Laud Humphreys.Humphreys' book is based on his 1968 Ph.D. dissertation, which was entitled "Tearoom Trade: A Study of Homosexual Encounters in Public Places."The study is an analysis of male-male sexual behavior in public toilets. Humphreys asserted that the men participating in such activity came from diverse social backgrounds ...

Tearoom Trade - Wikipedia
Earl Babbie identifies three purposes of social-science research: exploratory, descriptive and explanatory. Exploratory research takes place when problems are in a preliminary stage. Exploratory research is used when the topic or issue is new and when data is difficult to collect.

Variables are an important part of science projects and experiments. What is a variable? Basically, a variable is any factor that can be controlled, changed, or measured in an experiment. Scientific experiments have several types of variables. The independent and dependent variables are the ones usually plotted on a chart or graph, but there are other types of variables you may encounter.
