

## Generalized N Fuzzy Ideals In Semigroups

Eventually, you will definitely discover a new experience and talent by spending more cash, yet when? accomplish you take on that you require to get those all needs similar to having significantly cash? Why don't you attempt to acquire something basic in the beginning? That's something that will guide you to understand even more around the globe, experience, some places, like history, amusement, and a lot more?

It is your totally own mature to act out reviewing habit. among guides you could enjoy now is **generalized n fuzzy ideals in semigroups** below.

You can search category or keyword to quickly sift through the free Kindle books that are available. Finds a free Kindle book you're interested in through categories like horror, fiction, cookbooks, young adult, and several others.

### Generalized N Fuzzy Ideals In

introduced the concept of m-PF (commutative) ideals and m-polar (a, b)-fuzzy ideals in BCK/BCI-algebras [19,20]. To continue their work, they introduced a new aspect of generalized m-PF ideals and studied the normalization of m-PF subalgebras in [21,22]. Recently, Muhiuddin and Al-Kadi presented interval-valued m-PF BCK/BCI-Algebras [23].

### Regular and Intra-Regular Semigroups in Terms of m-Polar ...

The central objective of the proposed work in this research is to introduce the innovative concept of an m-polar fuzzy set (m-PFS) in semigroups, that is, the expansion of bipolar fuzzy set (BFS). Our main focus in this study is the generalization of some important results of BFSs to the results of m-PFSs. This paper provides some important results related to m-polar fuzzy subsemigroups (m ...

An ideal is a principle or value that an entity actively pursues as a goal and holds above other concerns perceived as being less meaningful. Terms relating to the general belief in ideals include ethical idealism, moral idealism, and principled idealism. An ethical idealist, moral idealist, principled idealist or simply an idealist insists on holding onto ideals even at a considerable cost as ...

### Ideal (ethics) - Wikipedia

In algebra, a homomorphism is a structure-preserving map between two algebraic structures of the same type (such as two groups, two rings, or two vector spaces).The word homomorphism comes from the Ancient Greek language: ὁμός (homos) meaning "same" and μορφή (morphē) meaning "form" or "shape".However, the word was apparently introduced to mathematics due to a (mis)translation of ...
