How to Install GIMP Plugins. There are two main ways to install GIMP plugins. First, the manual way. If your GIMP plugin is in a ZIP file, you'll need to copy the contents to GIMP's Plugins and Scripts folders. Make sure that the downloaded plugin has been unzipped before continuing.

The 8 Best GIMP Plugins and How to Install Them

flatpak install --reinstall flathub org.gimp.GIMP.Manual Flathub statistics indicate that there are nearly 230K users of our Flatpak package (with about 100K users updating GIMP within the first 2 weeks after a build update), which is pretty decent for a single package format on GNU /Linux.

GIMP 2.10.22 Released - GIMP

Note: Even though you have to install GIMP from MacPorts in order to build the binaries for BIMP, they should work just fine with the self-contained GIMP build from gimp.org. In fact, you could probably uninstall the MacPorts version once the binaries are built, but you'll need to reinstall it each time you want to update BIMP.

Creating a catalog file will take quite some time. Luckily you only need to create catalog file once. It will be created in same folder where install.wim file used to create it is located, in this example case now in my D:\ISO_Files\Sources folder. The filename will be install_Windows 10 XXX.clg where XXX is edition in question. Copy the catalog file to another folder to keep it for future needs:
