TCP Wireshark Lab - Working with a remote server. You will go through the steps below, use your captured wireshark file and the provided wireshark file (on D2L) to answer the questions. When you have finished the lab you will submit the following: This document with your answers provided in the appropriate places.

Solved: TCP Wireshark Lab - Working With A Remote Server ...

• Open Wireshark and enter "ip.addr == your_IP_address" into the filter, where you obtain your_IP_address (the IP address for the computer on which you are running Wireshark) with ipconfig. This filter removes all packets that neither originate nor are destined to your host. • Start packet capture in Wireshark.
