Unlike the clutch-pedal system in a manual transmission, the driver merely has to pull on the paddle to change gears. In most cases, the right paddle is used to upshift, as in shift to higher gear while accelerating and the left paddle comes in handy to downshift, as in shift to a lower gear during slowing down.

### Paddle Shifters Explained: How To Use Them And When To Do It

As per title, I cant shift my car out of park position and so Ive been using the shift lock override to shift it out of park for the past one week. Googled around and found a few possibilities for this. Wondering if this is a common problem. Car is currently at my workshop getting diagnosed. 1. I...
