What is a Nursing Diagnosis? A nursing diagnosis is a clinical judgment concerning human response to health conditions/life processes, or a vulnerability for that response, by an individual, family, group, or community. A nursing diagnosis provides the basis for the selection of nursing interventions to achieve outcomes for which the nurse has accountability.

Nursing care traditionally has been practiced within the complexity of families and has included culturally competent, holistic care (Campinha-Bacote, 1999; Leininger & McFarland, 2002; Munoz & Luckmann, 2005). It is well known that the family environment may have a positive or a negative effect on individuals in the family, depending on the family's values, beliefs, and ability to manage change.
