A leading question is a type of market research question that pushes respondents to answer a particular question in a specific manner, based on the way they are framed. Leading questions often already contain information that the survey creator wants to confirm rather than try to get a correct and unbiased answer to that question. 22.

Research Questions: Types and Research Question Examples

Objective test questions may be constructed as a list of possible answers, requiring the students to recognize the correct one from the list. These questions include matching, true/false, and multiple choice. Other objective test questions, like fill-in-the-blank questions, require that the student recall the correct answer from memory.

How to Study for Objective Test Questions

A question is an utterance which typically functions as a request for information, which is expected to be provided in the form of an answer. Questions can thus be understood as a kind of illocutionary act in the field of pragmatics or as special kinds of propositions in frameworks of formal semantics such as alternative semantics or inquisitive semantics.

Question - Wikipedia

research question is an interactive and inductive endeavour that takes place over time. A clear research question is vital and sets the scene for development of a clear research aim and objective that are inextricably linked (Martindale and Taylor 2014). Abstract Aim To describe the development of a research question, aim and objective.

Setting a research question, aim and objective

Employers may bring up the topic of pay at some point in the interview process. Sometimes recruiters ask this question during an initial phone screening, or they may hold off on discussing salary until you've met face-to-face. You may be asked for your salary expectations directly, on an application form, or in response to a pre-determined salary range offered by the employer.
