RV refrigerators can fail for a number of reasons. A common problem is when the refrigerator stops cooling properly -- especially after it hasn't been used in awhile. See how to solve a number of RV refrigerator repair issues yourself, online repair manuals for Dometic and Norcold refrigerators, and when it makes sense to replace instead of repair an RV refrigerator.

## **How To Fix An RV Refrigerator Yourself - Dometic & Norcold ...**

The RV propane refrigerator needs at least 10.5 volts of battery power to open up the gas valve and spark the ignitor. Without that, the LP gas line will not operate properly and will not run the refrigerator. When troubleshooting, check the battery power to ensure there is enough power available to ignite the RV propane refrigerator.
