BG Synthetic Blend 2-Stroke Engine Oil for Water-Cooled Engines is a blend of performance oils and proprietary additives specifically for small, water-cooled engines. When low quality oil is used in vehicles with high engine RPMs, engine heat can increase dramatically, which can damage lubricated engine components.

The 2000cc air-cooled engine was simply not up to the task of pushing around an even bigger, heavier box. Typical engine life is about 90,000 miles. Additionally, the first stab at the 4-speed shifter system was a complete failure and was totally re-designed with the introduction of the gasoline water-cooled model in late 1983.
